Abstract: Strengthening the Teaching Profession (P2K) is a form of learning in the form of service to the school, community and Muhammadiyah which is carried out by a group of students in order to advance the welfare of society and make the nation's life more intelligent. The aim of implementing P2K is to apply, practice and cultivate science and technology in order to advance general welfare and make the life of the nation intelligent, providing practical experience to practitioners in applying theory and practice. The implementation method used is the socialization method. Based on the results and conclusions of the implementation of P2K activities in Baju Bodoa Village, Maros Baru District, Maros Regency, the community service program has run well in accordance with the expected procedures. This activity has a very important impact on students and the environment they live in because they are required to adapt to the environment, atmosphere, place of residence and the language used daily. For this reason, students are able to have experience and knowledge about social relations and can apply the knowledge they have in the local community. And practitioners must also follow the rules that apply in the area where they live, participate in Village activities both outside and inside the P2K location. Implementation of P2K activities must also have the support of the Baju Bodoa Village community so that the Village government is able to facilitate all the needs required by practitioners in carrying out their activities.

Keywords: socialization; P2K; ward

Abstrak: Penguatan Profesi Guru (P2K) merupakan suatu bentuk pembelajaran berupa pengabdian kepada sekolah, masyarakat dan muhammadiyah yang dilakukan oleh sekelompok peserta didik dalam rangka memajukan kesejahteraan masyarakat dan mencerdaskan kehidupan bangsa. Tujuan penyelenggaraan P2K adalah menerapkan, mengamalkan, dan membudayakan ilmu pengetahuan dan teknologi dalam rangka memajukan kesejahteraan umum dan mencerdaskan kehidupan bangsa, memberikan pengalaman praktis kepada praktisi dalam menerapkan teori dan praktik. Metode pelaksanaan yang digunakan adalah metode sosialisasi. Berdasarkan hasil dan kesimpulan pelaksanaan kegiatan P2K di Desa Baju Bodoa Kecamatan Maros Baru Kabupaten Maros, program pengabdian kepada masyarakat telah berjalan dengan baik sesuai prosedur yang diharapkan. Kegiatan ini memberikan dampak yang sangat penting bagi siswa dan lingkungan tempat tinggalnya karena dituntut untuk beradaptasi dengan lingkungan, suasana, tempat tinggal dan bahasa yang digunakan sehari-hari. Untuk itu mahasiswa mampu mempunyai pengalaman dan pengetahuan tentang hubungan sosial serta dapat mengaplikasikan ilmu yang dimilikinya kepada masyarakat setempat. Dan praktisi juga harus

mengikuti aturan yang berlaku di wilayah tempat tinggalnya, mengikuti kegiatan Desa baik di luar maupun di dalam lokasi P2K. Pelaksanaan kegiatan P2K juga harus mendapat dukungan dari masyarakat Desa Baju Bodoa agar pemerintah Desa mampu memfasilitasi segala kebutuhan yang diperlukan oleh praktisi dalam menjalankan kegiatannya.

Kata Kunci: Sosialisasi; P2K; pakaian

Introduction

Strengthening the Teaching Profession (P2K) is a form of learning in the form of service to the school and community carried out by a group of students in order to advance the welfare of society and make the nation's life more intelligent. P2K is organized through various activities related to community service in the form of counseling, training, courses and other similar activities which aim to improve the knowledge, skills, creativity or character of the target community. Strengthening the Teaching Profession (P2K) is one of the courses that must be taken by students, as prospective professional educators, and is oriented in the field of service to the school and community. This P2K course has a weight of 4 credits which is offered in semester VII (seven), and is an absolute requirement for students to complete their studies.

The community service activities currently being held are a series of activities that must be carried out in partner villages that have been determined/determined. In carrying out Teaching Profession Strengthening (P2K) activities, students are expected to be able to provide and develop the knowledge they have gained during the lecture process and also develop an attitude of cooperation and be able to mingle or socialize with the community in the local village based on the practice location that has been determined by the P2K implementing committee.

Schools and communities are the main objects in carrying out Teacher Profession Strengthening (P2K) which contributes to students who run or carry out P2K in the target villages. In this way, Makassar Muhammadiyah University students provide positive things that can build public awareness of the importance, for example environmental cleanliness, mutual cooperation and so on. Strengthening the Teaching Profession (P2K) forms students, especially in the field of education or teaching, to equip everyone in one group to become professional teachers in their field who have skills in society and have a high sense of social responsibility in helping every community in the sub-district.

In implementing P2K, students or practitioners follow the provisions or rules that apply in the village, for example what habits are carried out by the community and students can also provide suggestions and benefits that can build the village to be better and increase high solidarity. Habits or customs in each sub-district are definitely different, so when carrying out community service students must follow them and carry out them in accordance with the provisions applicable in that community. Thus, Strengthening the Teaching Profession (P2K) is very important for prospective teachers because when they complete their studies, prospective teachers will live to socialize or interact in the community which can increase their level of intelligence, empathy and social feelings.

The general aim of implementing P2K is to apply, practice and civilize science and technology in order to advance general welfare and make the nation's life intelligent, providing practical experience to practitioners in applying theory and practice Laia, B., & Zai, E. P. (2020). Specifically, P2K or KKN is carried out with the aim of increasing the professionalism of practitioners in carrying out their future duties as educators living in the community, helping to solve problems faced by the community by utilizing the relevant expertise of academics, and increasing intellectual intelligence, emotional

intelligence, and social sensitivity in carrying out future duties as professional educators Laia, B. (2018).

The benefits obtained from implementing this activity are;

- a. Providing students with learning and work experiences regarding the application and development of science and technology outside campus.
- b. Training students to be more skilled in solving problems in society so they can empower the village community itself, Ziraluo, M., Fau, H. S., Simanullang, N. R., Laia, B., & Gaurifa, D. (2022).
- c. Deepen students' appreciation of the benefits of the knowledge learned for the implementation of development.
- d. Through learning and work experiences in carrying out direct community empowerment activities, students will develop professional traits.
- e. Deepen and appreciate the relationship of dependence and interest in cooperation between sectors.

Based on the explanation above, this activity was carried out in Bju Bodoa Village, which is one of the Villages in Maros Regency. The area of Baju Bodoa Village is 4,670 km², the Head of Baju Bodoa Village is Ali Rusdy S.T., the population of Baju Bodoa Village is 2,348 people. The livelihoods of the residents of the Baju Bodoa family are mostly in the agricultural, plantation, trader, civil servant and self-employed sectors.

Implementation Method

The methodology used is socialization. Socialization is a learning method for gaining knowledge about norms and values so that they can participate as members of community groups.

Results and Discussion

The results of implementing community service activities are explained in 2 programs created by practitioners based on the needs of the local community, namely:

1. Mutual Cooperation

Mutual cooperation is one of the characteristics of the Indonesian nation as stated in Pancasila, namely the third principle of "Indonesian Unity". Mutual cooperation is an activity that is carried out together and is voluntary so that the activities carried out run smoothly and easily. The mutual cooperation program was carried out for the reason of raising public awareness of the importance of maintaining environmental cleanliness because the local environment has a lot of rubbish scattered around. The benefits of mutual cooperation are as follows:

- a. So that our environment can feel clean and beautiful
- b. A sense of solidarity can be established within the community
- c. So that people's lives are better by holding mutual cooperation
- d. Strengthen brotherhood and togetherness among fellow citizens

Environmental security is increasingly guaranteed, with a sense of brotherhood and togetherness and getting to know each other among residents. Of course, if there are new arrivals or foreign guests, residents will certainly find out quickly.

Figure 1. Mutual Cooperation

- a. The purpose of mutual cooperation: Togetherness
Mutual cooperation reflects the togetherness that grows within the community, with mutual cooperation, people want to work together to help others or to build facilities that can be used together.
- b. Unity:
The togetherness that exists in mutual cooperation also creates unity between community members. With existing unity, the community becomes stronger and able to face existing problems.
- c. Willing to sacrifice
Mutual cooperation teaches every community to be willing to make sacrifices. These sacrifices can take the form of sacrificing time, energy, thoughts and even material things.
- d. Mutual help
Mutual cooperation makes people work together to help each other.
- e. Socialization
Mutual cooperation can make people aware again that they are social creatures. Mutual cooperation allows people to get to know each other so that the socialization process can continue to be well maintained.

2. Living Apothecary Planting

As a form of our community service, we are filling in the P2K Unismuh Makassar work program, in the Maros Baru District community, one of which is by planting live apothecaries as medicinal plants that can be used to make natural herbal medicines. This activity received great support from local agencies for all P2K students at the Faculty of Teacher Training and Education, Muhammadiyah University of Makassar.

Figure 4. Implementation of Living Pharmacy Planting

3. Technique and Implementation Schedule

a. Mutual cooperation

To carry out mutual cooperation activities, tools are needed such as: machetes, hoes, brooms and trash cans. The activities that will be carried out are cleaning up scattered rubbish and pulling out grass that disturbs the view. During the service period, practitioners carry out mutual cooperation activities twice a week:

- 1) Sunday, October 1 2023, at 09.00 WITA. Mutual cooperation is carried out by cleaning public cemeteries that have not been cleaned for a long time.
- 2) Monday, October 15 2023, at 09.00 WITA. Mutual cooperation was carried out at the Nuruh Falah mosque which is located in one of the Baju Bodoa sub-district areas.

b. Live Apothecary Planting

The planting of the living pharmacy will be carried out on September 23 2023, which will be located in the yard of the RT head's house in one of the areas in Baju Bodoa sub-district.

4. Evaluation and Sustainability

In this stage, activities refer to the results and findings obtained during program implementation as well as how to complete them and are evaluated in the form of table 1.

No	Name Activity	Results and findings Obtained
1.	Mutual cooperation	With this activity, the local community participates in cleaning mosques and public cemeteries so that the implementation of mutual cooperation activities can run smoothly and become a reflection for the people of Badoa sub-district to keep the environment clean without littering.
2.	Living pharmacy	By planting a live pharmacy, the community will easily get herbal medicines to use.

Conclusion

Based on the results of the implementation of P2K activities that have been programmed by student practitioners in Baju Bodoa Village, Maros Baru District, Maros Regency. On August 4 2023 - 61 days of community service have gone well according to the expected procedures. This activity has a very important impact on students and the environment they live in because they are required to adapt to the environment, atmosphere, place of residence and the language used daily. For this reason, students are able to have experience and knowledge about social relations and can apply the knowledge they have in the local community. And P2K practitioners must also follow the rules that apply in the area where they live, participate in village activities both outside and inside the P2K location. Implementation of P2K activities must also be supported by the community of Badoa Subdistrict so that the Lurah government is able to facilitate all the needs required by practitioners in carrying out their activities. The people of Baju Bodoa Village also really participate in making the activity program carried out by the practitioners a success. Thank-you note.
